Si2ren direct query

Figure 1: maxresdefault

Goal:

- Build a module that alow us to do direct queries from ANB to Siren.
- Develop a methodology and a workflow of the system (documentation, tools, expertise)

Actually

Beginning of the project (starting point)

- General documentation (situation)
- tools (for the project management)
- plan (road map)

Tools:

Figure 2: tools

To do

development

- Understand siren data model
- Test Siren search API
- Adapt our previous queries with the search API
- Generalise i2 data model (Flexible schema)

demo

- Conception of a scenario
- Find the right data sources
- Give a complete documentation
